

Going to hospital

If you get **really** sick you will go to **Northampton General Hospital**.

Staff from your ward will go to the hospital with you.

They will keep you safe.

The doctors at Northampton General Hospital will do all they can you help you.

The doctors will try and help you to get better.

Ventilation

If you get **really** sick, you may need help with breathing

The doctor will do this if your body is **fit and healthy**

One way they can help is using a **ventilator**

The machine will help you if you have trouble breathing.

The machine is **only** used when the person is sleeping

Ventilation

The doctor will give you **medicine** that will make you go to **sleep**

The machine will work when you are **sleeping**

The machine can make your **body tired**

When the machine has **done its job** and you are **better** you will be **woken up**

You will need to stay in **hospital for longer**
